

## Calvert City, Kentucky USA

In July 1949, the first employee walked through the gates of the Pennsylvania Salt Company Plant, known now as Arkema's Calvert City, KY specialty chemicals plant. The plant has contributed materials used in the production of everyday products and for sustainable solutions in markets like automotive, aerospace, and construction.

**Foranext**® specialty gases are used in the electronics industry for the manufacturing of semiconductors. Our **Kynar**® **PVDF** resins are used in the chemical processing industry, wire and cable protection, oil and gas piping, water filtration membranes, lithium ion/EV batteries, construction coatings and more. The **Forane**® refrigerants we produce are used as coolants in air conditioners and refrigeration equipment and in insulation for transportation, appliances, and construction.

**98%** reduction in greenhouse gas emissions since 2012

**251** current employees

**\$49** million in local impact (includes payroll/utility/property taxes over last 5 years)

**\$198** million in approved capital investments over the last 5 years for health, environment, safety, continuous improvement projects

Nearly **14** years without a lost time injury/over **10 million** man hours
