DEFECTIVE CYLINDER PREPARATION:

- 1. Prepare Documentation:** Each defective cylinder must include a "Warranty Sticker" and Return Authorization Number (RA#). Defective DOT-39 cylinders must be in the product carton and defective refillable cylinders must have a DOT tag and product neck label. If you have a Ton cylinder, contact Arkema Customer Service at (800) 245-5858 to obtain the necessary stickers, labels, or placards. It is illegal and unsafe to ship a leaking cylinder.
- 2. Palletizing:** Defective and Deposit Cylinders: Palletize defective cylinders and deposit cylinders together. All cylinders must be palletized and securely banded.
- 3. Reclaim Cylinders:** Do not mix reclaim cylinders with other returns. Reclaim cylinders should be on a separate pallet and accompanied by a distinct Bill of Lading (BOL). Contact Arkema Customer Service at (800) 245-5858 to discuss further.
- 4. Packaging:** Return all disposable cylinders in their original box, placing the Warranty Sticker on top. If you do not have the original box, contact Customer Service at (800) 245-5858 for guidance on using an overpack.
- 5. Loading Instructions:** Return cylinders on a pallet in quantities of either eight (2 rows of 4 cylinders) or twelve (3 rows of 4 cylinders). Do not load more than 12 cylinders per pallet.
